NeoFace[®] – Facial Recognition

You've seen it in the movies, now it's available. The world leader in fingerprint biometrics now brings to the New Zealand market a face scanning device which literally opens doors for your business. No more lost, borrowed or forgotten access cards, with the NeoFace™ Control you have access when you want and how you want.

Security Applications

Ideal for offices, commercial and private premises, sensitive zones, laboratories, airport secure zones, hotels, prisons, hospitals, safety deposit box rooms, data centres and executive offices.

Business Environment

Keypad and IC cards are the most widely adopted tools to control access to premises. This new era of biometric technology now provides reliability and accuracy give a heightened level of strength to authentication and verification.

NeoFace Control uses face recognition technology to identify an individual, they simply stand in front of the device which includes a display for easier face positioning.

Features

- Contactless and Convenient
- Colour Screen with Text Messaging
- 1 Second Verification
- 1 to Many Matching Algorithm
- Infrared Lighting
- Light Ring
- Time and Attendance
- Reporting
- Customisable Buttons
- Door Grouping
- User Roles
- Departments
- Time and Date Restrictions
- Identified and Failed Image Logging
- Network Administration
